girls who CODE

SELF-PACED PROGRAM

LEARN TO CODE AT YOUR OWN PACE!
FLEXIBLE SCHEDULES WELCOME!

Girls Who Code's **Self-Paced Program** is a free and flexible virtual introductory computer science course for **current 9th - 11th graders** (rising sophomore, junior and senior girls and non-binary students).

KEY HIGHLIGHTS OF SELF-PACED

- Make an impact through **hands-on, real-world projects** with our self paced coding modules focused on HTML, CSS, or JavaScript.

- **Earn certificates** in coding languages and build your portfolio by completing up to three modules.

- **Easy, pre-chunked learning** with each module featuring course videos, readings, and activities for structured, self-paced learning.

- Create a **flexible schedule** that works best for you! Complete modules (5-10 hours each) at your own pace, between July 6th and August 13th 2021.

- Get support from **small group advisory** sessions and cohorts with other Self-Paced students.

- Join an international community of coders!

SELF-PACED VS. SUMMER IMMERSION PROGRAM

Students will not be able to attend the Self-Paced Program and our Summer Immersion Program (SIP) at the same time. SIP is a synchronous, 2-week program that runs in the summer concurrently and has a more structured, daily schedule, while Self-Paced provides flexibility to create your schedule.

The application for Self-Paced is the same as the SIP application. Apply to Girls Who Code's Self-Paced Program by completing the Virtual Summer Immersion Program Application (only if you haven't done so already), and answering "Yes" when we ask if you are interested in the Self-Paced Program.

APPLICATIONS ARE DUE ON MARCH 19TH!
